

SHANKAR KUMAR

Python Developer | Django | Flask | REST API | AI Integration

 shankarkm1707@gmail.com |  9650360813 |  Greater Noida, Delhi NCR

PROFESSIONAL SUMMARY

Results-driven Python Developer with 2+ years of hands-on experience designing, developing, and optimizing scalable web applications using Django and Flask. Proven expertise in building AI-powered systems, automating workflows, and delivering government-grade software solutions. Skilled in REST API development, database optimization, and cloud deployment (AWS). Adept at working independently and in cross-functional teams to deliver high-quality code under tight deadlines.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS, jQuery

Frameworks: Django, Flask, Django REST Framework (DRF)

AI / ML: HuggingFace BART, GPT-4 Mini, Rasa, NLP, Regex Pipelines

Databases: MySQL, PostgreSQL, SQL Server, ORM

Cloud & DevOps: AWS (S3, EC2), Docker, Celery

Tools & Others: REST API, BeautifulSoup, IMAP Integration, Git, Debugging, Code Review

Concepts: OOP, DSA, Microservices, Data Normalization, Stored Procedures

PROFESSIONAL EXPERIENCE

Python Developer

Oct 2024 – Present

Cyfuture India Pvt. Ltd. — Greater Noida

- Designed and developed scalable Python applications independently, reducing delivery time by 20%.
- Automated repetitive business workflows using Python scripts, improving team efficiency by 30%.
- Optimized Python codebase using best practices, resulting in measurable performance improvements.
- Managed full project lifecycle from design to deployment with consistent on-time delivery.
- Integrated AI/ML models into production systems for intelligent data processing and automation.

Software Engineer

Dec 2021 – Sep 2022

Chetu Inc. — Noida

- Built reusable, modular components that reduced development effort by 25% across multiple projects.
- Developed scalable and maintainable code ensuring long-term system stability.
- Integrated new technologies into existing systems, enhancing overall platform capabilities.
- Collaborated with cross-functional teams to deliver features on schedule.

KEY PROJECTS

Government Grievance Portal | Python | Flask | SQL Server | NLP | HuggingFace

- Built a production-ready grievance automation platform processing incoming emails with intelligent NLP pipelines.
- Implemented HuggingFace BART summarization to transform unstructured emails into structured database records.
- Designed IMAP-based email ingestion system reducing manual processing effort by 80%.
- Developed Flask web app with full record lifecycle management, file upload, validation and status tracking.

- Optimized database interactions using parameterized queries and stored procedures for security and performance.

AI Chatbot System | *Rasa | Flask | GPT-4 Mini*

- Developed an AI-powered chatbot with intelligent Q&A using Rasa and GPT-4 Mini integration.
- Built document upload module enabling dynamic knowledge base updates for the chatbot.
- Automated Rasa YAML config generation and model retraining via Flask APIs — zero manual intervention.
- Improved chatbot accuracy and scalability through streamlined data ingestion and deployment workflows.

Government Data Collection Application | *Python | Django | MySQL | HTML | CSS | JS*

- Contributed to large-scale government data collection system integrating APIs from multiple ministries.
- Built data pipelines for decrypting, validating, and processing district-wise and state-wise datasets.
- Designed training module for system users and administrators, improving onboarding efficiency.

Supply Chain Management System (SCMS) | *Django | PostgreSQL | AWS | Docker | Celery*

- Developed end-to-end SCMS workflows covering procurement, inventory, distribution and POS transactions.
- Integrated Celery for async task processing, improving system response time significantly.
- Deployed on AWS (EC2, S3) with Docker for containerized, scalable production environment.

Government Inventory Management System | *Python | Django | MySQL*

- Enhanced Consumable Module with automated monthly limits, budget validation, and multi-level approvals.
- Implemented financial checks ensuring all requests remained within allocated budget limits.

EDUCATION

Master of Computer Applications (MCA)

Apr 2022

Indira Gandhi National Open University (IGNOU), New Delhi

Bachelor of Computer Applications (BCA)

Jun 2018

Indira Gandhi National Open University (IGNOU), New Delhi

ADDITIONAL

Competitive Exam Preparation: Advanced research methodology, academic writing, critical analysis, governance and public policy studies — skills that enhance structured problem-solving and documentation in software projects.
